Private Label Balloons

About us

Since 1979, at Globos Festival we have been filling with colour celebrations from all over the world thanks to our latex balloons 100% Made in Spain and with organic pigments.

During the years we have maintained our essence as a family company, but we have adapted our image and our productive processes to the needs of the market, with new colours and finishes created by our R&D department, and a continuous improvement of our quality system.

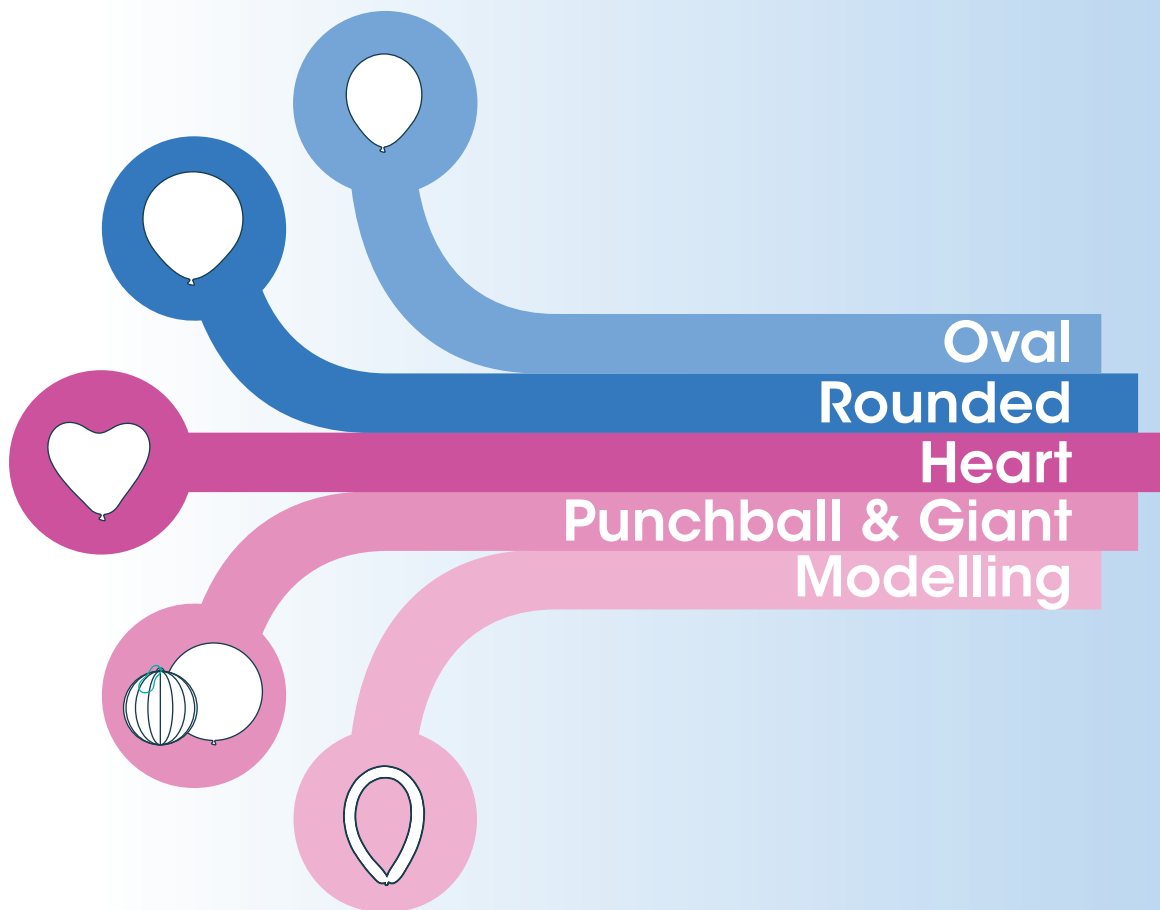

Together with our subsidiary company Gran Festival S.L., which was created in 2000 to act as our local distributor, we now have facilities covering over 9,000 sqm, and machinery with the most advanced technology for balloon manufacturing and printing, being able to print with up to 8 inks and up to 5 sides.

The result of this work has made possible that our balloons are currently present in more than 30 countries from 3 continents, and that large distributors and retail chains trust us as their main suppliers.
